Choice, dignity, privacy and independence are the cornerstones upon which Sheldon Park was built. Our residents enjoy apartment style living free from needless intrusion or the creation of unnecessary dependence. It is our pleasure to accommodate the needs of our residents in a dignified atmosphere where personal choice and privacy are both respected and encouraged. Every resident receives a personal care plan to ensure the appropriate help is provided for each level of care.

Ask about our *Personal Preferences* approach to individualized service. We recognize it is the resident's right to choose how to live each day in our community.

Assisted Living

Our residents enjoy a lifestyle of choice. This means many things, from our wide range of activities to meal choices. It also means that we are trained to provide a balanced approach to when and where a resident needs assistance. We strive to respect and preserve their independence and sense of freedom, while being sensitive to when intervention and assistance is warranted. At Sheldon Park, we practice Resident Centered Care. Whenever and however possible, we will tailor services, care and activities to each individual resident.

Kingswood Court Memory Care

Kingswood Court is a specialized Memory Care community that provides quality care to our residents who face Alzheimer's disease or other related dementias. Our uniquely designed neighborhood promotes safety, security, well-being, and life enrichment programs. Highlights of our Memory Care include specialized caregiver training and activities, spacious outside courtyard and interaction between Kingswood Court and our Assisted Living neighborhoods.

Respite

Our programs allow the caregiver time away from the heavy demands placed on them when caring for another and are a great way to experience our Sheldon Park lifestyle.
